### Smart Bite from Prevention Magazine

Post your question about prevention of cancer or what to eat during treatment at the American Institute for Cancer Research Web site, [www.aicr.org/](http://www.aicr.org/) hotline, or call (800) 843-8114 (United States only). A registered dietician will e-mail or call you with recommendations within 3 business days.

A study funded by the National Cancer Institute may put an end to the long-simmering debate of to Mammogram or not to Mammogram. The breast cancer death rate has fallen by 24% over the past decade. Seven teams of researchers from major cancer centers found that mammograms were responsible for up to half of the decline. That adds punch to a familiar message: All women age 40 and older should get a mammogram every year. Links for Life is standing in the fore-front of making it possible for all Kern county women.
